

- Solve the system: $y = 2x + 6$,
 $3x + y = 15$
 - Solve for x and y : $2x + 3y = 15$,
 $4x - y = 12$
- If two matrices A and B commute, then $AB = BA$.
 - True
 - False
- The inverse of an invertible matrix always exists.
 - True
 - False
- Answer True or False for each of the following statements:
 - The trace of a matrix is always equal to the sum of its eigenvalues.
 - True
 - False
 - If a matrix A is invertible, then its determinant must be zero.
 - True
 - False
- The derivative of the function $F(x) = \int_0^x \sin t \, dt$ is:
- Which of the following represents an antiderivative of e^{2x} ?
- Donner tous les choix qui sont 1.
